
EU ARTIFICIAL INTELLIGENCE REGULATION AT RISK IN WTO E-COMMERCE DEAL, STUDY SAYS

-

27.01.2021

EurActiv (27 January 2021)

The EUs attempts to regulate Artificial Intelligence could be met with future challenges resulting from an agreement on e-Commerce at the level of the World Trade Organisation (WTO), according to a new study published on Tuesday (26 January).

Talks have been ongoing since January 2019 between members of the WTO in a bid to agree on global rules to facilitate worldwide e-commerce transactions.

However, concerns have been highlighted that the text currently backed by the EU could result in a prohibition on signatories from adopting legislation that obliges firms to provide access to the source code of their software.
