Euronews (9 March 2023)

Russia unleashed a massive missile barrage on cities across Ukraine early Thursday, targeting energy infrastructure facilities in the first attack on such a scale in three weeks.

Ukrainian officials said residential buildings were hit but didn't immediately say if there were casualties. At least two people were injured in Kyiv after an explosion, according to the citys mayor.

The Zaporizhzhia nuclear power plant, which is the largest in Europe, is also reportedly "without electricity" after a Russian strike.
