The Times of Israel (17 August 2025)

Hebrew media report that Serbia is the European country behind a \$1.64 billion deal inked with Israeli defense giant Elbit Systems.

Elbit last week announced the deal for the supply of its long-range precision strike artillery-rocket systems and unmanned aerial vehicles, but did not name the customer.

As part of the five-year defense contract, Elbit will supply a suite of AI-powered unmanned aerial combat systems, including personally operated drones for tactical and operational use.
