Trend News Agency (24 December 2025)

Umar Abakirov

The Government of Tajikistan has approved the Program for the Development of the Electric Power Sector for 2026-2030 along with an Action Plan for its implementation, Trend reports via the Tajik government.

The document aims to improve the countrys energy infrastructure, with a particular focus on the use of hydropower and other renewable energy sources, as well as on the digitalization and modernization of the sector.

The program provides for the establishment of a competitive electricity market, strengthening energy security, the efficient use of hydropower and renewable resources, and the development of infrastructure to ensure a reliable electricity supply. Its main objectives include increasing power generation capacity, reducing losses in electricity networks, and expanding opportunities for electricity exports to regional markets.
