
KYRGYZSTAN LAUNCHES MAJOR POWER TRANSFORMER MAINTENANCE & UPGRADE PROGRAM

-

30.03.2026

Kazinform News Agency (29 March 2026)

Almas Zhexenbekov

Kyrgyzstan is set to undergo large-scale power transformer maintenance and upgrades in 2026, Trend reports via the Kyrgyz Ministry of Energy.

In line with directives from the Ministry of Energy of Kyrgyzstan to enhance the reliability of the energy sector and ensure a high-quality electricity supply, 298 power transformers with voltages of 6 □□□□□ kV will be repaired in Bishkek this year, with an additional 38 new power transformers installed.

The works are scheduled to take place from March through November 2026. The equipment upgrade is financed by JSC "KUET" and implemented by the Bishkek Electrical Networks enterprise.
