Azertag (20 April 2026)

On April 16, 2026, the Chambers of Representatives of Belgium and the Netherlands adopted resolutions aimed at undermining the Azerbaijan-Armenia peace process and the efforts undertaken by both countries to establish an atmosphere of peace and cooperation in the region. Azerbaijan's Milli Majlis strongly condemns and rejects these unilateral and biased documents, which refer in a distorted manner to the sovereign territory of our country and are based on false claims and ungrounded accusations, Azerbaijan's Milli Majlis said in a statement.

According to the statement, these documents, which distort the history and consequences of the conflict that existed between Azerbaijan and Armenia and which are brought forth by the unsound and racist imagination of the traditionally anti-Azerbaijani, Islamophobic circles, constitute a flagrant violation of international law and rule of law, as well as represent a provocation targeting the continuing peace process in the region which is at its sensitive stage currently.
