
TACKLING DISINFORMATION: 'IVERIFY ARMENIA' PLATFORM LAUNCHED IN ARMENIA

-

04.06.2026

EU Neighbours East (3 June 2026)

An EU-funded platform dedicated to tackling disinformation and fake news was launched in Armenia last month ahead of the parliamentary elections on 7 June.

The iVerify Armenia platform offers citizens a simple way to submit stories and information for fact-checking and verification.

The platform has been developed under the ARTEMIS project, and was implemented by a consortium of the Media Initiatives Centre, Hetq and CivilNet. It is designed to contribute to efforts to identify and address misinformation and improve transparency in the information environment.
