Kazakh Prime Minister Olzhas Bektenov has discussed the progress of joint projects in the gas processing and telecommunications sectors with Moutaz Al-Khayyat and Ramez Al-Khayyat, executives of Qatar's Power International Holding (PIH), the Kazakh government reported.

The discussions focused on the construction of two gas processing plants at the Kashagan field and a second line of the Beineu-Bozoi-Shymkent main gas pipeline.

According to the Ministry of Energy, the first gas processing plant at Kashagan will have an annual capacity of 1 billion cubic meters of gas. Construction and installation works are underway, and deliveries of the main equipment are almost complete. The plant is scheduled to be commissioned in 2027.
