The European Union wasnt set up to deal with challenges as vast and existential as the possibility of AI wiping out humanity.

For two decades, the EUs leaders have muddled through crisis after crisis from Greece coming within days of being pushed out of the eurozone, to Russias invasion of Ukraine, which forced millions to seek safety in the bloc. Each time, it has found a way through. Its what the EU does.

With AI, though, its turning out to be different.
