Tajikistans position within the evolving Middle Corridor networks is gaining strategic weight, supported by new transport and digital initiatives from the European Investment Bank, EIB Vice President Marek Mora told Trend.

"Transport and digital connectivity are central pillars of the EIBs mandate in Central Asia and of the EU Global Gateway strategy. Tajikistan plays an increasingly important role within this regional network," Mora stated.

Mora underscored that the EIB is pulling its weight in Team Europe's bid to bolster the Middle Corridor.
